### **Energas Adds Petroleum Engineer to Management Team**

OKLAHOMA CITY, Oklahoma – (BUSINESS WIRE) – March 9, 2006 --Energas Resources, Inc. (OTCBB: EGSR) is pleased to announce the addition of Mr. John Breitmeier as Vice President of Engineering to manage the engineering, evaluation, drilling and production operations of the Company. Mr. Breitmeier has over 13 years of progressive, broad experience in petroleum engineering environments onshore and off from Alaska to the Gulf of Mexico and the Rockies. For the foreseeable future, Mr. Breitmeier will work on location in Eastern Kentucky, the Company's current focus.

During his career, Mr. Breitmeier has worked with British Petroleum and worked 10 years with the U.S. Department of the Interior, Minerals Management Service and Bureau of Land Management. Mr. Breitmeier's petroleum experience includes well planning, permitting, drilling and development operations, deepwater, high H<sub>2</sub>S, arctic, directional, horizontal, underbalanced, coalbed methane, tight gas, sub sea, reservoir analysis, well declines, pressure transient analysis, material balance and volumetrics.

A few of Mr. Breitmeier's accomplishments include: rewriting major portions of GSAM nationwide gas simulation program including economic evaluation of unconventional gas plays for the U.S. Department of Energy, organizing project team bringing over 4000 wells with abnormal casing pressure from under 30% compliance to over 90% compliance in under a year, and preparing and running a new simulation model of West End area of Prudhoe Bay Field for British Petroleum.

Mr. Breitmeier holds a B.S. in Petroleum Engineering from Marietta College and an M.S. in Petroleum and Natural Gas Engineering from Pennsylvania State University.

"We are delighted to bring John on board and feel that he will be a strong addition to our team," stated Scott Shaw, Vice President, "It's rare that a company our size has the opportunity to welcome a person with John's experience. His knowledge and skills will be integral in moving the Company to the next level of performance."
